## EDUCATION

---

### Indian Institute of Technology Kanpur

*M.Tech + Ph.D. in Electrical Engineering; CPI: 9.7/10.0*

Kanpur, India

*July 2021 – ongoing*

- **Advisors:** Dr. Swathi Battula & Prof.(Dr.) Sri Niwas Singh

• **Relevant coursework:** Simulation of Modern Power Systems; Economic Operation and Control of Power Systems; Electric Power System Operation and Management under Restructured Environment; Introduction to Reinforcement Learning; Renewable Energy Economics, Policy and Regulations

### National Institute of Technology Srinagar

*B.Tech in Electrical Engineering; CGPA: 9.1/10.0*

Srinagar, India

*Aug 2017 – Jun 2021*

- **Advisors:** Prof.(Dr.) Abdul Hamid Bhat & Dr. Tabish Nazir Mir

### Kendriya Vidyalaya No.1 Jammu

*All India Senior School Certificate Examination (AISSCE); Percentage: 89.4%*

Jammu, India

*May 2017*

## PUBLICATIONS

---

### Journals

- S. Sharma, S. Battula and S. N. Singh, “IDSO-Managed Bid-Based Transactive Design for DER Participation in Wholesale Markets While Preserving T-D Interactions,” *IEEE Transactions on Energy Markets, Policy and Regulation.*, pp. 1-16 doi: [10.1109/TEMPR.2026.3661757](https://doi.org/10.1109/TEMPR.2026.3661757).

### Conference Proceedings

- S. Sharma, S. Battula and S. N. Singh, “Towards Improved System Flexibility: Enabling IDSO’s Swing Contract Market Participation,” *2026 IEEE Power & Energy Society Transmission & Distribution (T&D) Conference & Exposition, Chicago, IL, USA, 2026*, pp. 1-5 [Accepted].
- S. Sharma, S. Battula and S. N. Singh, “Transactive Electric Vehicle Agent: A Deep Reinforcement Learning Approach,” *2024 IEEE Power & Energy Society General Meeting (PESGM), Seattle, WA, USA, 2024*, pp. 1-5, doi: [10.1109/PESGM51994.2024.10688919](https://doi.org/10.1109/PESGM51994.2024.10688919).

### Preprints

- S. Sharma, S. Battula and S. N. Singh, “IDSO-Managed Bid-Based Transactive Distribution Systems Design for DER Participation in Wholesale Markets While Preserving T-D Interactions,” *arXiv preprint arXiv:2508.08187*, 2025., pp. 1-17 doi: [10.48550/arXiv.2508.08187](https://doi.org/10.48550/arXiv.2508.08187).

## AWARDS & ACHIEVEMENTS

---

**Prime Minister's Research Fellow (PMRF):** Awarded the prestigious research fellowship in India for a period of **3.5 years** starting from Jan 2023.

**Ranked FIRST in the Department of Electrical Engineering, NIT Srinagar :** Scored the highest CGPA among a class of 80 students.

**Cash Award and Letter of Appreciation from MHRD:** Awarded a cash prize and a letter of appreciation from Mrs. Smriti Zubin Irani, then Minister of HRD, GOI, for achieving the highest possible CGPA in the All India Secondary School Examination.

## SKILLS

---

**Programming:** C, C++, Python, MATLAB

**Technologies:** Git, Simulink, GridLabD, PSIM, CPLEX

**Visual Designs:** Canva, Illustrator, Photoshop

**Typesetting:** MS-Word, MS-PowerPoint, L<sup>A</sup>T<sub>E</sub>X

## EXPERIENCE

---

<b>Advanced Power Systems Laboratory, IIT Kanpur</b>	Kanpur, India
<i>Research Scholar</i>	<i>July 2021 - ongoing</i>
<ul style="list-style-type: none"><li>• Development of Integrated Transmission and Distribution Systems Testbed.</li><li>• Development of Bid-based TES-based Distribution Systems Testbed.</li></ul>	
<b>Power Electronics Laboratory, NIT Srinagar</b>	Srinagar, India
<i>B.Tech Project</i>	<i>Nov 2020 - June 2021</i>
<ul style="list-style-type: none"><li>• Development of novel SVPWM technique for matrix converters that employs all the valid switching states.</li></ul>	
<b>BSNL Advance Level Telecommunication Training Centre (ALTTC)</b>	Ghaziabad, India
<i>Student Intern</i>	<i>July 2019</i>
<ul style="list-style-type: none"><li>• Roles and responsibilities of the Electrical Engineering department in telecom industries</li></ul>	
<b>National Hydroelectric Power Corporation (NHPC), Salal</b>	Jammu, India
<i>Student Intern</i>	<i>Jan 2019 – Feb 2019</i>
<ul style="list-style-type: none"><li>• Working of a Hydroelectric Power Plant</li><li>• Electrical Engineering Department's role in the project.</li></ul>	

## TEACHING ASSISTANTSHIP DUTIES

---

### PMRF

<b>CSJM University Kanpur, India: L<sup>A</sup>T<sub>E</sub>X for Document Editing (Workshop)</b>	<i>Jan 2025 - April 2025</i>
<ul style="list-style-type: none"><li>• A 30-hour hands-on workshop for BTech students.</li></ul>	
<b>NPTEL Course: Smart Grids: Basics to Advanced Technologies</b>	<i>Jan 2025 – April 2025</i>
<ul style="list-style-type: none"><li>• Doubt clearing and problem-solving sessions.</li></ul>	
<b>CSJM University Kanpur, India: Python for ML/AI (Workshop)</b>	<i>April 2024</i>
<ul style="list-style-type: none"><li>• A 30-hour hands-on workshop for BTech students.</li></ul>	
<b>NPTEL Course: Smart Grids: Basics to Advanced Technologies</b>	<i>Jan 2024 – April 2024</i>
<ul style="list-style-type: none"><li>• Doubt clearing and problem-solving sessions.</li></ul>	
<b>ABV-IIITM Gwalior, India: Fundamentals of Electrical Engineering</b>	<i>Oct 2023</i>
<ul style="list-style-type: none"><li>• Problem-solving tutorial and laboratory practicals.</li></ul>	
<b>NPTEL Course: Fundamentals of Electrical Engineering</b>	<i>July 2023 – Oct 2023</i>
<ul style="list-style-type: none"><li>• Doubt clearing and problem-solving sessions.</li></ul>	

### IIT Kanpur

<b>EE630(P): Simulation of Modern Power Systems</b>	<i>Aug 2025 – ongoing</i>
<ul style="list-style-type: none"><li>• Conducting lab sessions for students to understand the fundamentals of power systems and equipping them with skills to perform simulations on Python.</li></ul>	
<b>EE675: Introduction to Reinforcement Learning</b>	<i>Jan 2025 – May 2025</i>
<ul style="list-style-type: none"><li>• Assisting instructor with correcting quizzes and assignments and clearing doubts of students.</li><li>• Preparing quizzes and assignments.</li></ul>	
<b>EE633A: Electric Power System Mgmt. &amp; Operation in Restructured Environment</b>	<i>Jan 2023 – May 2023</i>
<ul style="list-style-type: none"><li>• Assisting instructor with correcting quizzes and assignments and clearing doubts of students.</li><li>• Preparing quizzes and assignments.</li></ul>	
<b>EE632A: Economic Operation &amp; Control of Power Systems</b>	<i>Aug 2022 – Dec 2022</i>
<ul style="list-style-type: none"><li>• Assisting instructor with correcting quizzes and assignments and clearing doubts of students.</li><li>• Preparing quizzes and assignments.</li></ul>	
<b>ESO203A: Introduction to Electrical Engineering</b>	<i>Jan 2022 – May 2022</i>
<ul style="list-style-type: none"><li>• Preparing questions for the weekly quizzes and assisting tutors with correcting quizzes and doubts of students.</li></ul>	
<b>DPGC Duty</b>	<i>Aug 2021 – Dec 2021</i>
<ul style="list-style-type: none"><li>• Assisting the Departmental Post Graduate Committee with tasks such as admission verification, etc.</li></ul>	

## PROJECTS

---

### Python-based Three-Phase Distribution Optimal Power Flow Program (T-DOPF) | [GitHub](#)

- Developed a Pyomo-based solver for Three-Phase Distribution Network OPF (T-DOPF), addressing a lack of open-source softwares specifically tailored to three-phase systems.
- Implemented a Three-Phase LinDistFlow formulation that supports DERs and capacitors, enabling deeper operational and integration studies.
- Included thermal line limit constraints, a feature often missing in other solvers, to improve reliability and comprehensive modelling.

### Meta Reinforcement Learning using Recurrent Neural Networks | [GitHub](#)

- A course project for the course EE675A: Introduction to Reinforcement Learning at IIT Kanpur
- Meta Reinforcement Learning is a technique which focuses on learning how to learn. Meta RL can help you adapt quickly to a task, even if it is much different than what it was originally trained for.
- Tested on bandit agents with different environments to make them adapt to a policy quickly to achieve the maximum reward.
- The results were compared with other state-of-art agents such as UCB, Thompson Sampling etc.

### Novel Technique to implement SVPWM for Matrix Converters | [GitHub](#)

- As part of my B.Tech Final Year Project implemented a project that can utilise all of the switching states while using the SVPWM technique for modulation of matrix converter coupled to an induction motor load.
- The switches, when controlled using a PWM technique, have a drawback of Common Mode Voltage (CMV) between the ground of the AC supply and the neutral of the motor load.
- A Zero-CMV technique has been proposed in literature which limits the CMV by using only the rotating space vectors in the SVPWM. But it results in a limit over Voltage Transfer Ratio of 0.5
- But using the active and zero space vectors in the SVPWM of Matrix Converters results in a VTR of 0.866
- Hence, to have the best of both worlds, a technique which utilises all of the space vectors is proposed.
- Received an **Outstanding** grade for this project.

## RESEARCH INTERESTS

---

- Transactive Energy Systems Design
- Transmission & Distribution Interactions
- Power Market Operations
- Integrated Transmission & Distribution Systems Modelling
- Deep Reinforcement Learning Applications to T&D Designs

## ORGANIZATIONS

---

**Institute of Electrical and Electronics Engineers (IEEE)**  
*Graduate Student Member*

*Dec 2021 – Present*

**IEEE Power & Energy Society Student Branch Chapter IITK**  
*Secretary*

*Feb 2024 – Jan 2025*

**IEEE Power & Energy Society Student Branch Chapter IITK**  
*Webmaster*

*Feb 2023 – Jan 2024*
